

Marble Refinisher

Technical Data

Product Description:

A water-based specially formulated mixture of polishing chemicals and micro-abrasive powders in a suspension. It is used to remove etching, dullness, watermarks, and restores the polish of marble and other calcite stone.

Uses:

For polished marble, travertine, terrazzo, polished limestone, and onyx.

Application: **Shake the bottle well.**

1. Apply Marble Refinisher directly over area to be polished. Use approx. ½ - 1 ounce for 15 sq. ft. area.
2. Attach a white polishing pad to a standard floor-polishing machine (150 to 350 rpm) or to a hand held polisher.
3. Begin polishing by moving the machine across the stone surface. Keep the surface wet by sprinkling water. The polishing time will vary by type, condition of stone, and machine used. (Range from 30 to 90 seconds per square foot.)
4. Cleanup with Stone Cleaner using a sponge, mop or wet vacuum.

Coverage:

400-600 sq. ft. per quart

Expected Wear:

Depends on traffic and type of cleaner used.

Maintenance:

Use Brightstone Clean-N-Seal

Handling and Storage:

Store closed container in a cool dry area. Do not allow to freeze.

Caution:

KEEP OUT OF REACH OF CHILDREN

If swallowed: Do not induce vomiting; drink large quantities of water.

Eye and Skin Contact: Flush with water.

Important Notice:

The stone surface must be free of coatings. Remove wax or acrylic coatings with Stone Stripper. If the stone surface is highly worn or deeply etched, it is recommended to first hone or wet sand the surface with a 1200 grit sanding pad.

Liability is limited to refund of the purchase price since application of the product is beyond the control of the manufacturer or supplier. Brightstone recommends testing any products used on fine stone on a small inconspicuous area to determine its efficacy or unexpected results.
