

STONE COLOR ENHANCER

Technical Data

Product Description:

Stone Color Enhancer is a water-based silicon emulsion that when applied rejuvenates, enhances, darkens, deepens, and brings out the color and appearance of stone. It is also a penetrating **sealer** that inhibits stains.

Uses:

For use on **unsealed porous** stone such as tumbled marble, travertine, limestone, flamed granite, flagstone, slate and sandstone, Also, for use on surfaces such as colored concrete, saltillo, concrete pavers and brick.

Application:

Stone surface should be clean, and free of other types of sealers, coatings and waxes.

1. Apply product as an even film on the stone surface using a paint roller, brush or lambs wool applicator. **Work and spread into the stone using the applicator.**
2. One can also apply by spraying when working on larger surface areas or on walls.
3. Wipe off excess if any only on very dense stones. Like travertine or honed marble.
4. Do not wash the stone surface for 24 hours following the application.
5. *Some stones need more than one application.*

Coverage:

Coverage depends on the type of stone, porosity. Typically 200-300 sq. ft. per gallon.

Maintenance:

Use Brightstone Clean-N-Seal

Handling and Storage:

Store in closed container.

Keep in a cool area and do not allow to freeze.

Caution:

KEEP OUT OF REACH OF CHILDREN

If swallowed: Do not induce vomiting; drink large quantities of water.

Eye and Skin Contact: Flush with water.

Important Notice:

Brightstone recommends testing any products used on fine stone on a small inconspicuous area to determine its efficacy or unexpected results.
