

Technical Data

Product Description:

A water-based liquid suspension of special wax that is used for the beautification of **polished** stone. It enhances the shine and increases the depth of color on polished stone counter tops and table surfaces.

Uses:

For the beautification of **polished** marble, limestone, onyx, granite, travertine, serpentine, terrazzo, and other fine polished stone. It is ideal for counters, walls, vanities, and tables.

Application:

1. Spray lightly on stone surface.
2. Spread evenly with a soft cloth or towel.
3. Allow drying to a haze (Apx. 5-10 minutes) depending on environmental conditions.
4. With a clean dry cloth, buff surface rapidly until it attains shine. If a polishing machine is used for buffing, use a white synthetic polishing pad or a lamb's wool pad.

Coverage:

Coverage depends on type of stone and method of application

Expected Wear:

N/A

Maintenance:

Always seal natural stone to prevent stains. For stain protection, use **Brightstone Sealers**.

Limitations:

Will not remove etch marks and scratches from natural stone. Not recommended for floors.

Handling and Storage:

Store in closed container. Keep in a cool dry area. Do not allow to freeze.

Caution:

KEEP OUT OF REACH OF CHILDREN
